

IFM2B10: Practical 4

Due Date: 31 August 2016, 10:00

You are now required to extend practical 3. You need to make the following changes.

Implement a database with the following tables:

User

Video

Update the registration page to add users to the database

The users should be added as either a customer or an employee

Update the login page

Provide functionality for the login page

Update the page to add videos

Videos should be added to the database

Update the video information page

The site should make use of a single page to display video information

One video's information should be displayed at any one time.

Use URL parameters to specify which video to display.

Update video listing page

The list of available videos should be generated from the database.

Make use of session variables to ensure that users can only see relevant pages

Employees can see all the pages

Customers can only see the video listing and video information pages

Users that are logged in can only see the login page

Bonus:

Make use of Bootstrap to stylize the website.

Description	Marks
Login Page	15
Register Page	15
Add video Pages	10
Video listing Page	20
Video information Page	20
Session variables	20
Bonus	20
TOTAL	100
<i>Attendance is compulsory. If you do not attend your submission will not be marked. If you engage in the act of plagiarism you will receive 0. If you do copy, both parties will lose all marks.</i>
